To Whom It May Concern:

Regarding: Docket #98N-1038, "Irradiation in the production, processing
and
handling of food"

While I personally believe that irradiation of food is harmless to
consumers if done properly, I feel that labeling of these items is
essential. I appreciate all efforts that identify the contents of the
foods that I consume and strongly object to any information being
witheld. An educated consumer is not a thing to be feared. Thank you
for your time.
